Previous Rejections

Unless specifically repeated/maintained infra, all previous rejections are withdrawn.

Obviousness Rejection

Claims 1-15 and 34-38 were rejected under 35 U.S.C. 103(a) as being unpatentable over French Patent 2 178 441 (full English language translation) in view of MacFarlane et al (USP 5,313,267).

This rejection is maintained and is now applicable to claims 1-15, 32 and 34-38.

Applicant argues that the prior art does not fairly suggest, teach or disclose the instantly claimed subject matter, particularly the newly recited reflectance values and reflective particles. The use of such particles appears to be conventional in the cosmetic art, however, as acknowledged at pages 16 et seq. of the instant specification; moreover, the reflectance value of 550 to 675 nm appears to represent nothing more than orange coloration: see page 13, lines 15-18.

Where functional parameters such as the instant hue angle, saturation, covering values, etc. are recited and the prior art discloses otherwise similar prior art, the burden is on applicant to demonstrate the unobviousness of those parameters. See <u>In re Greenfield</u>, 197 USPQ 227 (C.C.P.A. 1978). In that case, certain paint additives were functionally characterized as being unexpectedly stable in the presence of formaldehyde. At page 229 of the decision, the court

Application/Control Number:

10/743,455 Art Unit: 1614

unambiguously stated that, despite the fact that the rejection was one of obviousness and not anticipation, the burden was nevertheless on applicant to provide factual verification of the alleged functional property:

Appellants argue that the prima facie case is rebutted by a showing that, under the claimed pH conditions, 3-isothiazolones normally decompose, but that they do not do so when formaldehyde is added to the composition; that is, the presence of formaldehyde in the paint compositions have the unexpected property of stabilizing the 3-isothiazolone. However, the validity of the argument depends on whether it has been demonstrated the claimed 3-isothiazolones normally decompose under the claimed conditions... We are inclined to agree with appellants that, if the record establishes that formaldehyde stabilizes the claimed 3-isothiazolones under the claimed conditions, the prima facie case would be rebutted... Appellants have submitted no objective evidence to demonstrate the existence of a degradation problem of 3-isothiazolones and rely solely on the specification.

The examiner similarly maintains his rejection of instant claim 32 as being drawn to the determination of certain parameters necessary to arrive at cosmetic compositions having the instantly claimed appearances through the application of routine experimentation.

Action is Final

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

Application/Control Number:

10/743,455 Art Unit: 161

Art Unit: 1614

however, will the statutory period for reply expire later than SIX MONTHS from the mailing

date of this final action.

Correspondence

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Frederick Krass whose telephone number is (571) 272-0580. The

examiner can normally be reached at (571) 272-0580 on Monday through Friday from 9:30AM

to 6:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Ardin Marschel, can be reached at (571) 272-0718. The fax phone number for the

organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent

Application Information Retrieval (PAIR) system. Status information for published applications

may be obtained from either Private PAIR or Public PAIR. Status information for unpublished

applications is available through Private PAIR only. For more information about the PAIR

system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR

system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
